

# Evgeny Denisov

Male, 33 years, born on July 27, 1989

E-mail: [evgenij.denisov@gmail.com](mailto:evgenij.denisov@gmail.com) — preferred means of communication

LinkedIn: <https://www.linkedin.com/in/evgeny-denisov-748b10129>

Citizenship: Russia. Current location: Montenegro. Willing to relocate to EU.

## ***Desired position: Technical Game Designer***

**Employment:** full time, flexible schedule.

**Skills:** Software development.

**Technologies:** Python, Git, Linux, Docker, SQL.

**About me:** I enjoy adding new features into existing software with high attention to details. Besides Python, I have some knowledge in other programming languages and game engines: C++ (UE), C# (Unity), JavaScript (Phaser). When I play video games and see some interesting mechanics, I always think: "How would I implement it? How could I improve it? How can I exploit or break it?" (the last question is from my QA experience). I believe I am capable of both inventing and implementing game mechanics. This is why I decided to change my field of activity.

## ***Work experience — 7 years 3 months total***

---

July 2020 – February 2023 (2 years 7 months)

**Zubr** Saint Petersburg, [zubr.io](http://zubr.io)
